

# **Bisturmed International Meeting on Advanced Arthroscopic Surgeries, Portorož, October 17, 2025**

## **Program**

7:45 - 8:00      Introduction  
*B. Ambrožič*

## **Advanced Arthroscopic Procedures**

Moderators: Bozkurt, Stražar

8:00 - 8:15      Biceps rerouting and patch augmentation for massive cuff repair  
*D. Martinčič*

8:15 - 8:30      Transosseous reconstruction of the shoulder cuff  
*B. Poberaj*

8:30 - 8:45      Physeal-sparing ACL reconstruction techniques  
*R. Van Dijck*

8:45 - 9:00      Arthroscopic repair and reconstruction of the ATFL  
*B. Ambrožič*

9:00 - 9:15      MPFL reconstruction techniques  
*E. Servien*

9:15 - 9:30      Reasons for failed patellofemoral stabilisation  
*P. Schoettle*

9:30 - 9:45      Discussion

9:45 - 10:15      Coffee break

## **Highlight lectures**

Moderators: Drobnič, Ambrožič

10:15 - 10:30      Use of NAD+ in high profile sports and fast regeneration  
*P. Schoettle*

10:30 - 10:45      Next frontiers – bone grafts, cell and exosome therapy: preclinical and clinical experience  
*A. Delfini*

|               |                                                                                              |
|---------------|----------------------------------------------------------------------------------------------|
| 10:45 - 11:00 | ACL graft choice: rectus femoris and peroneus longus tendon<br><i>R. Van Dijck</i>           |
| 11:00 - 11:15 | Minimally Invasive Innovation: The Role of Nanoscopy in Orthopaedics<br><i>V. Stevanović</i> |
| 11:15 - 11:30 | Discussion                                                                                   |

## Navigation and Robotics in Orthopaedic Surgery

Moderators: Lopez Vidriero, Poberaj

|               |                                                                                          |
|---------------|------------------------------------------------------------------------------------------|
| 11:30 - 11:45 | Principles of navigation and robotics in orthopaedic surgery<br><i>U. Vovk</i>           |
| 11:45 - 12:00 | Navigation in hip-preserving surgery<br><i>K. Stražar</i>                                |
| 12:00 - 12:15 | Navigation in shoulder surgery: benefits and limitations<br><i>D. Martinčič</i>          |
| 12:15 - 12:30 | Computer-assisted surgical procedures for knee and ankle surgeries<br><i>B. Ambrožič</i> |
| 12:30 - 12:45 | Robotic in knee arthroplasty<br><i>E. Servien</i>                                        |
| 12:45 - 13:00 | Discussion                                                                               |
| 13:00 - 14:15 | Lunch                                                                                    |

## Advanced Techniques in Meniscal Rupture Treatment

Moderators: Servien, Van Dijck

|                |                                                                                   |
|----------------|-----------------------------------------------------------------------------------|
| 14:15 - 14:25  | Root and ramp meniscus repair<br><i>B. Ambrožič</i>                               |
| 14: 25 - 14:35 | Circumferential compression sutures<br><i>M. Bozkurt</i>                          |
| 14: 35 - 14:45 | Conservative treatment of degenerative tears with PRP<br><i>E. Lopez Vidriero</i> |
| 14:45 - 14:55  | Meniscus centralisation<br><i>M. Drobnič</i>                                      |

|               |                                                                                        |
|---------------|----------------------------------------------------------------------------------------|
| 14:55 - 15:10 | Meniscus augmentation and transplantation: 15 years of experience<br><i>M. Bozkurt</i> |
| 15:10 - 15:30 | Discussion                                                                             |
| 15:30 - 16:00 | Coffee break                                                                           |

## Biologic Enhancements & Orthobiologics

Moderators: Ambrožič, Bozkurt

|               |                                                                                                           |
|---------------|-----------------------------------------------------------------------------------------------------------|
| 16:00 - 16:15 | Minimally invasive anaesthesia for outpatient orthopaedic surgery<br><i>B. Peček</i>                      |
| 16:15 - 16:30 | Current evidence for the use of orthobiologics<br><i>V. Stevanović</i>                                    |
| 16:30 - 16:45 | Bone marrow oedema: minimally invasive treatment with PRP infiltration<br><i>E. Lopez Vidriero</i>        |
| 16:45 - 17:00 | Biomaterials in joint preservation procedures<br><i>M. Drobnič</i>                                        |
| 17:00 - 17:15 | Osteochondritis dissecans of the knee joint: drilling, fixation and new approaches<br><i>R. Van Dijck</i> |
| 17:15 - 17:30 | Discussion                                                                                                |
| 17:30         | End of course<br><i>B. Ambrožič</i>                                                                       |
