Bisturmed International Meeting in Advanced Arthroscopic Surgeries

Kempinski Palace, Portorož | October 17, 2025

About the meeting

The Bisturmed International Meeting is a specialist symposium focussing on advanced arthroscopic and orthopaedic surgical techniques, regenerative medicine and phisiotherapy. In 2024, the event brought together over 100 orthopaedic surgeons, specialists and researchers from across Europe and beyond.

- **International faculty of experts**

Renowned speakers from leading clinics and institutions presented the latest findings in knee, shoulder, ankle and hip arthroscopy.

- **Video demonstrations**

High-quality surgical videos and case-related discussions.

- **Networking opportunities**

Ample time for interaction between clinicians, researchers and industry leaders.

- **Exhibition area**

A dedicated area in the main conference hall offers sponsors the opportunity to showcase their innovations and network with attendees.

About the organiser

Bisturmed is a private orthopaedic medical center based in Izola, Slovenia, directed by Dr Bogdan Ambrožič, a renowned orthopaedic surgeon in Slovenia and abroad. Ambrožič has an extensive track record in organising professional events and is dedicated to providing new knowledge among colleagues. With his extensive surgical experience in sports medicine and as an active contributor to international surgical innovations, he is well known in the professional community.

- **Specialising in arthroscopy and regenerative orthopaedics**
Focused on advanced minimally invasive techniques for joint repair and preservation.
- **Education & innovation**
Bisturmed is committed to continuous education and knowledge sharing. It organises high-level meetings and workshops for orthopaedic professionals from Slovenia and abroad.
- **International network**
Collaborations with renowned experts and institutions throughout Europe and the Adriatic region.
- **Well-received events**
Last year's event, which focused on regenerative medicine in orthopaedics, received excellent feedback for its scientific content, organisation and networking value. It was supported by 20 sponsors and over 100 participants.
